URECAMatch - Lab 5 Submission Index

SC2006 Software Engineering, SCEF Group 4.

Repository: https://github.com/softwarelab3/2006-SCEF-A4

Team: Ian Tan, Robin Teoh, Nicholas Ng, Edwin Tan Qi Lun, Benjamin Ng.

Final submission

The Lab 5 requirements and design documents are stored in this folder. They are linked here alongside the implementation, tests and demo video.

Deliverable	Location
Software Requirements Specification, including the Use Case Model	Final SRS
Use Case descriptions	Final Use Case descriptions
Key classes and relationships	Final class diagram
UI state machine / dialog map	Final dialog map
Source code	Application repository folder
API test cases	API tests
Web end-to-end test cases	Web tests
Demo video	Watch the URECAMatch demo
Meeting minutes and coordination record	Retrospective team coordination summary

Setup and traceability

Material	Location
Requirements, implementation and test mapping	Traceability table
Application setup	Setup guide

Implementation folders

Component	Location
Web application	Web source
API application	API source
Database schema and seed files	Database files
API contract	Shared API files

Individual peer review

Each team member submits their own peer-review survey separately through the course's announced submission channel.
